PROFESSIONAL SUMMARY

Proactive Cloud & DevOps Engineer with hands-on production experience architecting resilient cloud infrastructure on AWS, automating multi-stage CI/CD pipelines, and shipping enterprise-grade cross-platform systems. Proven expertise operating under strict Non-Disclosure Agreements (NDA) on scalable AI platforms, designing modular Terraform/Terragrunt architectures, orchestrating containerized microservices, and leading full-cycle software delivery from system design to Google Play Store releases. Demonstrates unwavering momentum with 1,700+ GitHub contributions over the past year, backed by deep competence in SRE observability (Prometheus/Grafana), Docker, Linux administration, and autonomous AI workflows.

CORE TECHNICAL COMPETENCIES

CLOUD INFRASTRUCTURE & IAC

AWS (EC2, S3, RDS, VPC) | Terraform | Terragrunt | Route53 Automated Failover | AWS Bedrock LLMs | IAM Security Policies

CONTAINERS & CI/CD PIPELINES

Docker & Multi-Stage Builds | Kubernetes & Helm | GitLab CI/CD | GitHub Actions | Traefik Reverse Proxy | Zero-Downtime Deploy

OBSERVABILITY, MONITORING & SRE

Prometheus | Grafana Dashboards | Loki & Promtail Logging | CloudWatch Metrics | k6 Load Testing (1,000 req/s)

FULL-STACK, MOBILE & DATA ARCHITECTURE

Next.js 16 (React, SSR) | Flutter & Dart (Native App) | TypeScript / Node.js | Python | PostgreSQL & PostGIS | Redis Caching | Stripe Escrow Safe-Pay | Neo4j (Cypher)

PRODUCTION EXPERIENCE

DevOps & Cloud Infrastructure Engineer · BYOUR — Intelligent Hiring AI Platform
2026 – Present | Dublin, IE

UNDER STRICT NDA

- Architected and provisioned modular AWS cloud infrastructure using **Terraform & Terragrunt** powering the Minerva AI applicant scoring engine under a non-disclosure agreement.
- Engineered automated **GitLab CI/CD pipelines** facilitating continuous automated testing, containerization, and zero-downtime microservice deployments.
- Provisioned and secured **AWS Bedrock LLM** integrations, hardened isolated VPC subnets, and established comprehensive CloudWatch operational dashboards.
- Configured high-availability multi-zone networking with **Route53 automated DNS failover** and RDS PostgreSQL read replicas to ensure high fault tolerance.

Lead Platform & Mobile Architect · NextStep Marketplace [Working Title]
2026 – Present | Ireland

PRODUCTION-READY & GOOGLE PLAY DEPLOYED

- Architected and delivered a production-ready, commercial marketplace platform (working title *NextStep*) tailored for the Irish automotive and classifieds market.
- Engineered high-performance web frontend on **Next.js 16 (App Router)** featuring Leaflet/PostGIS spatial radius search, live car finance calculators, and An Post postal logistics.
- Built native mobile application on **Flutter & Dart** (120 FPS, clean architecture), validated via 52 widget tests, and successfully **deployed signed release APK to the Google Play Store ↗**, ready for live dealer inventory onboarding.
- Designed a robust 10-state **Stripe Escrow Safe-Pay payment machine** with direct dealer chat negotiation, live dispute arbitration, and nightly self-healing reconciliation cron jobs.
- Maintained rigorous engineering standards with **1,043 automated tests** (Vitest, Playwright, Flutter), 0 TypeScript errors, Strix AI pentest security validation, and 100% bilingual parity (3,165 translation keys in English & Gaeilge).

Mobile QA & Technical Debugging Engineer · AstroMind
2025 | Freelance

- Provided technical development assistance for a cross-platform mobile application (Cordova/Angular) with **10,000+ active downloads** on Google Play.
- Analyzed mobile crash logs, managed Gradle/Android build dependencies, debugged payment workflows, and reduced bug recurrence rate by **30%**.

Online Server Technical Support & SRE · Synergy SNG Community
2024 | Volunteer

- Administered Linux game servers, resolved 150+ complex technical tickets, and performed low-latency network troubleshooting under active online load.

HIGHLIGHTED PRODUCTION SYSTEMS

AWS S3 Simulator & Centralized Observability Stack

Live Demo ↗ Source Code ↗

Production-grade S3-compatible object storage system built with MinIO and Flask, fully instrumented with enterprise SRE observability tools.

- Metrics scraping via **Prometheus** with custom Grafana dashboards visualizing storage quotas, request latency, and HTTP status codes.
- Centralized logging pipeline using **Promtail** and **Loki** for real-time log ingestion, search, and container health monitoring.

Enterprise AI Support Ticket Classification SaaS

Live Demo ↗ Source Code ↗

Resilient AI microservice API automating support ticket triage with multimodal LLMs, Stripe billing, and Redis infrastructure.

- Dual-engine pipeline utilizing **Google Gemini 2.0 Flash** as primary classifier with automated OpenAI fallback on API rate limits.
- Redis-backed rate limiting, bulk CSV batch processing, integrated Stripe subscription billing, and automated Prometheus metrics.

UA → IE Automotive Scout & VRT Import Tax Engine

Live Demo ↗ Source Code ↗

Automotive meta-search platform and financial calculator bridging Ukrainian and Irish car markets with automated tax computation.

- Resilient parallel scrapers with **Puppeteer stealth** anti-bot bypass for DoneDeal, AutoRia, and RST.
- Dynamic Irish tax engine calculating customs, VAT (23%), NOx levy, and CO_2-based VRT rates with live European Central Bank currency conversion.

Privacy-First AI Email Automation Platform

Source Code ↗

Enterprise privacy-compliant customer email triage system leveraging local open-source LLMs deployed on Kubernetes clusters.

- RAG (Retrieval-Augmented Generation) pipeline running on self-hosted **Ollama (Gemma 7B)** without third-party data leakage.
- Orchestrated via **Kubernetes & Helm charts** with automated GitHub Actions CI/CD pipelines and zero-downtime rolling updates.

CERTIFICATIONS & PROFESSIONAL CREDENTIALS (COMPLETE)

ARTIFICIAL INTELLIGENCE & GRAPH DATABASES

Neo4j Certified Professional	Neo4j Graph Academy · 2026
Autonomous Agents and Workflows	OpenAI Academy · 2026
Applied AI Foundations (Enterprise GenAI)	OpenAI Academy · 2026
AI Foundations (ML & Neural Networks)	OpenAI Academy · 2026
Generative AI: Prompt Engineering Basics	IBM · 2025

CLOUD, DEVOPS & CONTAINERS

Docker Foundations Professional Certificate	Docker Inc. · 2025
Ubuntu Linux Professional Certificate	Canonical · 2025
DevOps Professional Certificate	LinkedIn & PagerDuty · 2025
CentOS Linux & Hypervisor Essentials	EPAM Systems · 2025
DevOps Essentials Introduction	EPAM Systems · 2023

NETWORKING, SYSTEMS & SECURITY

Networking Basics (TCP/IP, Routing)	Cisco Networking Academy · 2025
